

Ayushe Nagpal, 5 - B

Name of Book: The Weekday Sisters

Genre: Realistic Fiction

A man and his wife lived in a small house. They both worked for their living, they were teachers in different schools. Every morning after having breakfast they would wait for the bus. The lady would go south and the man would go north. They had six daughters, each born on a different day. The man and his wife had not much time so they named them on the day of the week they were born on. Sometimes the man would pass Tuesday but he would not realize. One day after work when they came home they found a totally new child weeding the garden and then they saw it was Saturday. So they called all their daughters. They were surprised to see six. Soon they got unwell and died. Now how will the children survive???

This book was very realistic. I found it to be a little sad but would still like to recommend it.
