

Report on the online talk with doctors in each section of class V in relation to the topic of 'Diseases'

Dr. Indira Ganeshan, Dr. Richa Yadav and Dr. Mathur took out time from their busy schedules to speak to our children in each of the 3 sections of class V on Monday, 20th July, 2020. They talked about different diseases prevalent in India and how to prevent them. It was indeed an enriching experience for all of us to learn more about this concept which is being covered currently in our Life Science classes.

The valuable information shared by all three Doctors was immensely useful as they spoke about ways to maintain health and hygiene as well as about the Corona virus, among other viral, bacterial and mosquito borne diseases. They answered so many of the children's queries about vaccinations and various common diseases - their symptoms, preventions and cures.
