

The Constitution of Class 4

We, the children of class 4 should have the right to choose what we want to eat for lunch. When we move to the next class we should be allowed to choose which friends we want to be with in that class. One right we should have is to choose the number of hours we want to watch TV and play. We should also have the right to choose the sport we want to play. Eating junk food once in a while should also be a right.

It is our responsibility to keep our books and stationary ready before our class. We should clean up our room every time we play, paint or make a mess. A very important responsibility is to complete our homework and submit it in time. It is our responsibility to do all our follow up if we miss any class. We should be very responsible to always wear a mask when we meet somebody and keep social distancing.

Our first duty as students should be to always attend our classes on time. It is our duty to help our parents with various chores. If our friends need any help with their homework, it is our duty to help them with it. We must follow all the instructions given by our parents and teachers. Our most important duty should be to save water and electricity which will help save the natural resources for our future.

The first rule which we must all follow is to never waste any food. We must wash our hands or sanitize them before we eat. When we go to a library we must always keep silence and not disturb anyone. As a rule, we should brush our teeth at least twice a day and take care of our health and hygiene.
